Beat inflation. \$10.00 put in the bank today will not be worth \$10.00 5 years from now. But \$10.00 invested in our small plants should be worth \$50.00 to \$100.00 in a few years. In addition you get a lot of pleasure watching them grow. You are also doing your part to add beauty to a troubled world.

The plants we have to offer are too small now for landscaping, but by placing them in a nursery bed and carefully nurturing them - you will be surprised at the lovely showing they will make in 2 or 3 years. The specimens of Azaleas, Pieris Japonica, flowering trees, yews and shrubs many of our customers have acquired in a few years are amazing. These plants would be quite expensive if purchased as large specimens but with a little patience and time you too can produce specimens from these baby plants we have to offer.

These plants are vividly described in Hette's Book on Shrubs and Book on Trees at \$4.00 Each postpaid. We can supply both. Make good Christmas and birthday presents. All plants should be grown in a bed for one or more years before planting in permanent place.

For \$5.00 you can select \$6.00 worth of plants from this list. Prices include packing and postal charges. As we sell our plants at such low prices no order of less than \$2.00 will be accepted. No broken lots will be sold. Where order calls for 5 for 50 cts. one will not be sold for 10 cts. 5 must be ordered. 25 sold at 100 rate.

Prices per 100 are net, no discount.

Please suggest one substitute per 10 items ordered.

Owing to our careful packing with wet peat moss; the cost of Express and Parcel Post to points beyond Rocky Mountains, eliminates the profits. Therefore, please add 10% to remittances from these places.

The group containing Azaleas are very easy to handle if planted in part shade, provided either by a building or a lath screen; this should be elevated 4' to 5' on stakes to provide free circulation of air underneath. Plant in a soil mixture containing 50% good light garden loam and 50% granulated peat moss or oak leaf mould. Water well after planting and mulch with leaf mould or peat moss. Do not cultivate but pick weeds out by pulling. Do not allow ground to get dry, but do not water too much or too often, there is a happy medium. These plants will all do well in part shade and also in sun. Cut off 75% of light for first 6 weeks and then 50%.

AZALEAS AND OTHER ACID LOVING PLANTS:

"Chinese" E. H. Wilson said speaking of Azaleas, "They are not surpassed in wealth of blossom by any class of hardy shrubs. The flowers vary enormously in size in the different species and embrace all shades of every color except blue. In many, the flowers are delightfully fragrant, -- small wonder the desire to possess them is so general. No class of shrubs possesses greater attractions, and given certain essential conditions and provided the varieties are perfectly hardy their culture is fairly simple."

A Philadelphia collection of Azaleas and Rhododendrons is visited each year by thousands of people who marvel at the brilliant, vivid colors and profusion of bloom, which is almost unbelievable, and yet for a few dollars and a bit of patience a more extensive range of colors and varieties is available from this list.

PRICES PER 100 ARE NET - NO DISCOUNT

- Azalea Kaempferi Hybrids - evergreen Orchid - 3-6" - 3 for 50 cents. Very large flowered, clear colors. An easy one to grow. Makes a handsome shrub.
- * KURUME HYBRIDS - Choice from cuttings - selected from clear pinks, reds and maroon shades - 3-5" - 3 for 50 cents.

In winter time American gardens present a dismal, naked sight that emphasizes the general dreariness of the season. Little of the beauty of spring, summer or fall remains. Yet it is so easy to change this with a few evergreen vines, shrubs and trees and some bright berried shrubs. With an attractive evergreen background, winter seems shorter and much more pleasant and nothing is a more beautiful sight than to see them partly covered with snow.

EVERGREEN TREES AND SHRUBS. Plant in any good soil. All should be well shaded for 2 months after planting with a lath shade or planted in part shade of a building. Mulch with either peat moss or leaf mould. Most of the following plants will make handsome specimens in three to four years.

- Abelia Grandiflora, semi evergreen with arbutus like flowers - 8-12" - 2 for 50 cents - Buxus Japonica - Jap box - large apple green leaves - 3-6" - 5 for 50 cents - very hardy 6-8" - 3 for 50 cents - \$10.00 per 100.

- Pachysandra Terminalis, 5 for 50 cents - \$5.00 per 100. Plant 6" apart.

The picea or spruces are most attractive evergreen trees which introduce a horizontal note into landscaping and give a wonderful variety of color and shapes. Both Firs and Spruces make majestic trees, are very symmetrical and keep a good color in winter.

- PICEA EXCELSA - Norway Spruce, grows rapidly into a beautiful symmetrical tree.

4-7" - 3 for 50c.

- PICEA PUNGENS - Colorado Blue Spruce - stiff blue needles, 3-6" - 3 for 50c.

Most Pines grow rapidly, some more rapidly than deciduous trees, making as much as 30 inches a year. Make good screens, backgrounds and the best possible windbreaks. With a good Pine border on the windward side, your home will seem 500 miles further south and you will be able to grow plants that are otherwise impossible. A windbreak of pines will make your home more comfortable and life more pleasant, by protecting it from the cold winds.

PRICES PER 100 ARE NET - NO DISCOUNT

- Azalea AMOENA - Semi double purplish red flowers in profusion. Small evergreen leaves, turning beautiful bronze in fall - 3-5" - 3 for 50 cents.
